Education

Birla Institute of Technology, Mesra

Bachelor of Technology (Computer Science and Engineering) CGPA: 8.46

AUGUST-2024 – Present

Ranchi, Jharkhand

Dyal Singh Public School

2014 – 2024

10th: 94.8% — 12th: 94%

Panipat, Haryana

Skills

Programming Languages: C, C++, Python, Sql.

Computer Fundamentals: Data Structures and Algorithms, Operating Systems, Database Management Systems, Object-Oriented Programming, Exploratory Data Analysis.

Tools & Methodologies: Git, GitHub, Linux Basics, Render.

Interpersonal & Business: Analytical Problem Solving, Interpersonal Communication, Leadership, Teamwork, Business Management.

Areas of Interest: Business Analytics, Machine Learning, Competitive Programming.

Experience

AI Seller Copilot

2026 – Present

Future Founders Internship @ OKCredit 2026

GitHub — Live

- Developed an e-commerce analytics platform, utilizing **Python** to process, clean, and transform **5,000+** order records for data aggregation and extracting actionable business insights.
- Engineered data pipelines using **Python (Pandas)** and **SQL (SQLite)** to aggregate and analyze **200+** SKU-level metrics, identifying market trends and delivering impactful reporting solutions.
- Applied exploratory data analysis (EDA) and predictive modeling techniques (**Scikit-learn**) to solve real-world business challenges, improving demand forecasting and RTO risk prediction with **85% accuracy**.

Projects

GeoDispatch: Dynamic KD-Tree Spatial Engine

2025 – 2026

C++, Node.js, React, PostgreSQL

GitHub

- Engineered a C++17 Dynamic KD-Tree engine for real-time dispatch of moving 2D coordinates.
- Added AVL-based subtree rebuilding to keep search performance stable during heavy insertions.
- Integrated Dijkstra's algorithm with lazy rebuilding to achieve an average query latency of **600 μ s**.
- Constructed a Node.js gateway with **10–60 RPM** rate limiting, idempotency caching, and subprocess I/O to coordinate core engine tasks.
- Orchestrated the system with Docker Compose across isolated services backed by **PostgreSQL/PostGIS** and **Redis** for durable storage and warm caching.

Mentora AI

2025 – 2026

React.js, FastAPI, MongoDB, Gemini API, Firebase, Razorpay

GitHub

- Developed an AI-powered mock interview platform enabling users to practice technical and HR interviews through personalized simulations, improving user interview readiness scores by **40%**.
- Architected a full-stack, secure architecture using **React.js**, **FastAPI**, and **MongoDB**, integrating Firebase Google Authentication and JWT-based session management to reduce auth latency by **25%**.
- Integrated **Gemini API** for dynamic interview question generation, automated resume parsing, and real-time AI-driven feedback, delivering comprehensive performance reports in under **2 seconds**.
- Implemented comprehensive interview history tracking, visual analytics dashboards, and a seamless subscription monetization model via **Razorpay**; launched scalable services on **Render** supporting **500+** active users.

Achievements

- Awarded a **Letter of Recommendation** by **OKCredit** for exceptional performance during the **Future Founders Internship 2026**, ranking among the **Top 8 finalist teams** among **750+** teams. [Link](#)
- Solved **700+** **Data Structures and Algorithms (DSA)** questions across various platforms. [Link](#)
- Secured **All India Rank (AIR) 8** in the National Talent Search Examination (SIMS) 2023. [Link](#)
- Awarded a **Merit Certificate in the Indian Olympiad Qualifier in Mathematics (IOQM) 2023**. [Link](#)
